Phone: +63 926 638 7191 | Email: aljonbacani005@gmail.com | Philippines

Professional Summary

Results-driven Technical Virtual Assistant with hands-on experience in business automation, AI agents, workflow optimization, lead enrichment, CRM automation, and no-code/low-code development. Experienced in Zapier, Make.com, and n8n.

Core Skills

Zapier, Make.com, n8n, AI Automation, CRM Automation, Lead Enrichment, Asana, Xero, Gmail Automation, Google Drive, Facebook Automation, RAG Systems, AI Agents, Virtual Assistance

Automation Projects & Experience

Zapier – Automated Blog Publishing – Created workflows that automatically generate and publish blog content to Facebook pages, reducing manual posting and improving content distribution.

Zapier – CRM & Asana Automation – Streamlined CRM processes in Asana by building five key automations that improved workflow efficiency, task management, lead tracking, and communication consistency.

Zapier – Lead Enrichment Automation – Built automated lead enrichment workflows to gather and organize prospect information, improving lead quality and sales readiness.

Make.com – Xero to Asana Automation – Developed an automation that exports account transactions from Xero, converts data into CSV format, uploads files, and synchronizes information with Asana.

Make.com – Gmail Attachment Automation – Built a workflow that automatically sorts Gmail attachments and stores them in organized Google Drive folders.

n8n – AI Agent for Facebook – Created an AI-powered Facebook inquiry assistant that answers customer questions using information from company whitepaper documents, ensuring accurate and controlled responses.

n8n – AI Jobs Scraper + Resume Optimizer – Built an AI workflow that scrapes job opportunities, analyzes job requirements, and helps optimize resumes for better job matching.

n8n – Automated YouTube Shorts & Facebook Reels Creator – Developed an automated content creation workflow for generating and publishing short-form video content across social media platforms.

n8n – AI Appointment Setter – Created an AI-driven appointment scheduling system that qualifies leads and automates booking workflows.

n8n – RAG (Retrieval-Augmented Generation) System – Implemented RAG-based AI agents capable of retrieving information from knowledge bases and delivering accurate context-aware responses.

Education

Bachelor of Science in Aircraft Maintenance Technology – Philippine State College of Aeronautics
(2019–2023)
